Forage

The new crop membership service for livestock and dairy farmers

Our Network 'Forage' subscription option will help transfer the benefits of improved grass, clover and forage maize varieties and new developments in forage crop agronomy effectively onto livestock, dairy and mixed farms. Research results and advice is delivered through various routes including member-only events and field days and the NIAB TAG Network's interactive website. The subscription package also provides guidelines on combinable crops agronomy, geared specifically to members managing both livestock and arable crops, relevant to their needs and end-uses.

Ben Freer
Head of Technical Services, NIAB TAG

Dr Gareth Burns
Forage Crop Specialist, NIAB TAG

Access the unique knowledge bank that is the NIAB TAG Network and push the boundaries of your livestock crop production.

Introductory price for Annual Membership

As a NIAB TAG Network Forage member you will exclusively benefit from:

September

Autumn – Cereal Crop Agronomy Guide – uncomplicated agronomy strategies to support the management of autumn sown cereals.

January/February

Forage Crop Variety Booklet – comprehensive individual descriptions, combined with the essential management information to aid spring crop variety selection.

March

Spring – Cereal Crop Agronomy Guide – straightforward agronomy strategies to support the spring management of spring and autumn sown cereals.

April

Forage Crop Agronomy Guide – covering key issues such as weed control in forage maize, and cereal crop silage including oats for ensiling.

Plus

Timely Updates and Alerts throughout the year on agronomy, legislation, and cross-compliance actions. Grass heading date predictions and maize dry matter accumulation predictions to aid harvesting decisions.

Additional benefits

10% discount on our training courses

Telephone access to NIAB TAG Regional Agronomist

Invitations to our local, regional and national events

Part of a unique forum to learn and network
